

Thermon Advances Conductive Polymer Technology

High Performance **HTSX™**

Self-Regulating Heating Cable

We just couldn't leave a good thing alone. We had to make it better! But, we've been doing that for over 50 years. We call it innovation and excellence.

Thermon expands our line of **High Performance HTSX** self-regulating heating cable. We took our innovative TSX self-regulating heating cable (introduced in 1983 and still on the job today) and made it more durable, more flexible, more powerful . . . better!

HTSX has the highest temperature ratings in the industry and is suitable for use in applications requiring maintenance temperatures up to 250°F (121°C) or *high temperature exposures up to 482°F (250°C)*

Available with six power output options (3-20 W/ft, 10-66 W/m) and rated for both 100-120 Vac and 200-277 Vac, **HTSX** provides optimal design capability.

Features

- Higher Self-Regulating Performance
- Higher Temperature Ratings
- Optimal Power Ranges
- Improved Flexibility
- Worldwide Approvals

Your next heat tracing project deserves **HTSX**. Call us today for more details or visit us on the web at www.thermon.com.
